Module 1 Assignment 1: Exploring Different Ways of Accessing LLMs

Assignment Submission Deadline: 1st Mar 2026, Sunday, 11:00 pm

Overview & Instructions

Before diving into industry use cases and real-world problem solving, it is essential to first understand the different ways of accessing Large Language Models (LLMs). Knowing how to interact with LLMs—through web interfaces, APIs, integrated platforms, or local deployments—will help you recognize what is technically possible and practically feasible. Once this foundation is established, you can move on to Industry Problem Research and GenAI Opportunity Assessment, where you will analyze organizational challenges and identify areas where GenAI can create value.

This Assignment folder includes 3 files as below. During the session for the first ~2 hours, mentor will give the walkthrough of below files to help you get familiar with different ways of accessing LLMs:

- **Step-by-Step Guide - Different Ways to Access LLMs (PDF)**
- **M1_AST_01_API_based_LLM_Access.ipynb (Assignment Notebook)**

Later in the remaining ~1 hour, you need to attempt the following activity and discuss with the mentor:

- **In-session Activity - Industry Problem Research & GenAI Opportunity Assessment (PDF)**

Submission Instructions

For successful submission, you need to

- Download the Assignment notebook (M1_AST_01_API_based_LLM_Access.ipynb) from LMS dashboard, open it with Google Colab
- Complete the 'Setup Steps:' of the Assignment notebook by filling in the credentials. [ID: Your Registration ID, Password: Your Registered Mobile Number]
- Execute the code cells by clicking the play button or Ctrl + Enter and understand the given code

- Fill the technical+feedback questions given at the end of the Colab notebook and run the cells. At last you should see a submitted message.
- You will be automatically evaluated only on the correct answer to the given technical question.

Score: Correct answer for the technical Question will be awarded a score of 5 points. Assignment submission deadline is Sunday 11 PM i.e. 8 days post the tutorial walkthrough session.
